

Oscar Saul Zainos Almaraz

· Phone: 4424371715 · Email: oscar.zainos@gmail.com ·

Recently graduated Software Engineer from the Computer Science Faculty - UAQ, with experience in cross-platform software development. I stand out for my analytical approach, teamwork skills, responsibility, and ability to quickly adapt to new technological environments.

TECHNICAL SKILLS

- **Frontend Development:** JavaScript (ES6+), HTML, CSS, Typescript, Vue.js, React, Responsive Web Design, Component-Based Architecture, UI/UX Implementation
- **Tools & Platforms:** Git & GitHub, Visual Studio Code, Figma, Wordpress, Joomla, Jenkins, Stable Diffusion, Generative AI Tools,
- **Creative Software:** Photoshop, Illustrator, After Effects, Premiere Pro, FL Studio, Clip Studio Paint
- **Additional Skills:** Technical Documentation, Incident Management, Troubleshooting, Account Provisioning, Workflow Optimization, Team Collaboration, Adaptability to New Technologies
- **Languages:** English – Advanced, Spanish - Native

PROFESSIONAL EXPERIENCE

Tata Consultancy Services (TCS) / May 2019 – Jan 2026

IT Service Desk Analyst / CSRP Team Member

- Provided first-level technical support for international clients in enterprise environments.
- Managed incidents, service requests, and user access administration through Helix and internal ticketing systems.
- Assisted users with password resets, account unlocks, permissions, onboarding, and offboarding processes.
- Maintained SLA compliance while handling multiple support requests in fast-paced environments.
- Created and updated internal technical documentation and knowledge base articles.
- Collaborated with cross-functional teams to improve ticket resolution efficiency and workflow processes.
- Participated in the CSRP (Client-Specific Resolution Project), contributing to process optimization and faster incident resolution times.
- Supported troubleshooting activities involving software access, authentication issues, and internal systems.
- Demonstrated strong communication skills while assisting users from different regions and technical backgrounds.

PORTFOLIO PROJECTS

Interactive Data Management Dashboard – React + Typescript

- Developed reusable and scalable frontend components using React and TypeScript.
- Implemented dynamic state management for real-time data visualization and interaction.
- Focused on maintainable code structure and responsive user interfaces.
- Improved usability through modular component architecture and organized project structure.

Responsive Landing Page Design & Development – Figma + Code

- Designed responsive UI/UX prototypes in Figma and translated them into functional frontend implementations.
- Applied mobile-first design principles to ensure compatibility across multiple screen sizes.
- Built visually clean layouts with attention to accessibility, spacing, and user experience.
- Integrated modern styling techniques and responsive behaviors.

Personal Creative Portfolio Website - HTML5, CSS3, JavaScript / React, Figma

- Designed and developed a personal portfolio website focused on digital art and frontend presentation.
- Built interactive gallery systems and smooth navigation experiences.
- Combined visual identity design with frontend development to create cohesive branding.
- Implemented animations, responsive layouts, and modern UI interactions.
- Continuously improving the platform with new frontend features and design updates.

EDUCATION

Universidad Autónoma de Querétaro (UAQ)

Bachelor's Degree in Software Engineering

CERTIFICATES

- "Essential Skills in Adobe Photoshop" – 2025 – LinkedIn Learning
- "AWS Academy Cloud Foundations" – 2025 – AWS Academy

ADDITIONAL INFORMATION

- Currently expanding knowledge in backend technologies and modern web development workflows.
- Interested in frontend engineering, UI/UX design, creative development, and interactive digital experiences.
- Experience working in collaborative and international environments.
- Open to relocation opportunities.
